

## **SUPPLIES NEEDED**

- Empty 2 Liter Soda Bottle
- Soil
- Leaves, grass, newspaper and fruit scrapes and everything else that is suitable to be composted

## **INSTRUCTIONS**

Cut off the top a 2 liter soda bottle and rinse it out well. Remove the label so everything can be seen inside the bottle.

Start with a layer of soil on the bottom and alternate between soil and compostable material. You can use just about any plant matter like dead leaves, grass and pine cones. Sprinkle with water. Put a kitchen towel over the top of the bottle and put the bottle in window where it gets sunlight.
